## ONGOING

Online Hackathon

Part of Hack All February ↗

Submit Your Project ↗

Join our online hackathon and build generative UI applications with the power of Tambo. May the components be with you.

⭐ Register Now

📅 2 Feb - 8 Feb

Ends in 14 hours

### Prizes

\$6,000+

## ABOUT THE UI STRIKES BACK

A long time ago in a galaxy far, far away... developers struggled with static UIs that couldn't adapt to their users. But a new hope has emerged! The UI Strikes Back is a galactic online hackathon that brings together developers, builders, and innovators from across the universe. Harness the power of Tambo's Generative UI SDK to build

React applications where the AI decides which components to render based on natural language conversations. Whether you're a Jedi Master of code or a Padawan just beginning your journey, this hackathon is your chance to join the Rebel Alliance of innovative developers building the future of user interfaces.

## Awaken Your UI Powers

Join the rebellion against static interfaces

In a galaxy of static interfaces, users are forced to learn complex applications and navigate through endless workflows. But the Force has awakened in the form of Generative UI!

droid that understands over six million forms of user intent.

Whether you're a seasoned Jedi or a young Padawan, this hackathon gives you the power to build interfaces that truly respond to user needs.

## Build Anything

No limits on your creativity

Create any project you want - chat interfaces, dashboards, AI assistants, or tools. The more Tambo features you use, the stronger your Force becomes.

## Generative UI

Powered by Tambo

Use Tambo's React SDK to create interfaces where the AI chooses which components to render. Build apps that adapt like a true Jedi adapts to the situation.

## Win Prizes

\$6,000+ in rewards

Compete for galactic prizes, exclusive swag, and job/intern interviews at Tambo. Top 3 Jedi Masters take home \$6,000 plus rewards.

Compete for legendary prizes and showcase your mastery of the Generative UI Force

## Top 3 Jedi Masters

**Grand Champion**

**\$3,000**

**Jedi Knight**

**\$2,000**

**Padawan Elite**

**\$1,000**

+ exclusive swag for all winners

+ job/intern interviews at Tambo

**Rebel Alliance Rewards**

swag bundles.

**Top 10 Posts Win Swag Boxes**

## Career Opportunities

All winners will get the opportunity to interview for job and intern positions at [Tambo](#). Showcase your skills and join the team building the future of Generative UI!

**Job & Intern Interviews at Tambo**

## SPONSORS

**Tambo**

Generative UI SDK for React

Check out Tambo

decides which ones to render based on natural language conversations. Users shouldn't have to learn your app - Generative UI shows the right components based on what someone is trying to do. Whether you're building a startup or scaling an enterprise application, Tambo makes creating adaptive, AI-powered interfaces simple and developer-friendly. Join the Rebel Alliance and build UIs that truly respond to user intent!

The Coding Agent OS

[Claim Free Credits ↗](#)

Build and ship your project with Charlie — get an autonomous TypeScript engineer in your GitHub repo. Charlie can implement new features end-to-end, create ship-ready PRs that match your repo's style and conventions, and iterate based on your feedback.

**Get 10,000 credits (\$500 of value) — more than enough for the hackathon and beyond!**

## JUDGING CRITERIA

Evaluates how effectively the project addresses a meaningful problem or unlocks a valuable use case.

## Creativity & Originality

Assesses the uniqueness of the idea and how Tambo is used in creative ways.

## Learning & Growth

Recognizes the learning curve tackled during the hackathon, especially for first-time builders.

## Technical Implementation

Reviews how well the idea was executed technically and the quality of integration with Tambo SDK.

## Aesthetics & UX

Considers how intuitive and user-friendly the final experience is, especially if the project has a frontend.

## Best Use Case of Tambo

Evaluates how effectively the project leverages Tambo's Generative UI capabilities to solve real-world problems and demonstrate innovative applications of the SDK.

# Frequently Asked Questions

I registered as a solo participant. Can I switch to a team?

Can I use existing or previously made projects?

How can I submit my project?

I am a beginner in tech, can I still participate?

Are we allowed to take help of AI tools like ChatGPT?

Where can I connect for other queries?
